COMPETITION RULES AND REGULATIONS

Please read and follow all rules carefully.

1. Each team is allowed **only one skip** during the competition.

2. Each team must have two participants:
• One person to handle the robot on the track.
• One person to operate the robot remotely.

3. The robot must successfully cross all **5 checkpoints** to complete the track.

4. The competition time will be divided as follows:
• 3 minutes for testing and calibration.
• 7 minutes for the actual run.

5. Only **one round** will be conducted. The winner will be selected based on the best performance.

6. The maximum permitted robot dimensions are **20 × 20 × 20 cm**. Robots exceeding these dimensions will be disqualified.

7. Ready-made robots are strictly prohibited. However, ready-made sensors are permitted.

8. Bulged batteries are not allowed. Teams must carry their own chargers and ensure that the robot is powered appropriately during participation.

9. The robot may use an LED indicator, buzzer, or blinking light to indicate successful completion at the stop box. **Extra points** will be awarded if the robot blinks its LED or sounds its buzzer and stops at the endpoint.

10. A maximum of **2 hand touches** is permitted. More than 3 hand touches will result in disqualification.

11. Participants must follow all instructions given by the event coordinators and judges.

12. Any violation of the competition rules may result in penalties or disqualification.

13. The judges' decision shall be final and binding. No arguments or appeals will be entertained.
